Number 3

Regeneration rates in the ocean ....................... A. Lerman and D. Lal 238

Oxygen isotope relations between diagenetic silica minerals in Monterey Shale, Temblor Range, California
K. J. Murata, Irving Friedman, and J. D. Gleason 259

The association hypersolvus granite—subsolvus granite—“solvbergite” at Andrew’s Point, Cape Ann, Massachusetts: a case of localized fenitization ........................................... Robert F. Martin 273

The system MgO–SiO₂–H₂O at high pressures and temperatures—stability field for hydroxyl–chondrodite, hydroxyl–clinohumite and 10 Å-phase ...... Katsuhiro Yamamoto and Syun-iti Akimoto 288

Phase relations of portlandite, Ca(OH)₂ and brucite, Mg(OH)₂ to 33 kilobars ............ A. J. Irving, W.-L. Huang, and P. J. Wyllie 313

Mineral equilibria in the MgO–SiO₂–H₂O system: I. Talc–chrysotile–forsterite–brucite stability relations
J. J. Hemley, J. W. Montoya, C. L. Christ, and P. B. Hostetler 322

REVIEW

Porphyry Deposits of the Canadian Cordillera—A Volume Dedicated to Charles S. Ney; edited by A. Sutherland Brown ....................... Brian J. Skinner 352
