

CONTENTS TO VOLUME 297

NUMBER 1

- Contact metamorphism surrounding the Alta stock: finite element model simulation of heat- and $^{18}\text{O}^{16}\text{O}$ mass-transport during prograde metamorphism
Stephen J. Cook, John R. Bowman, and Craig B. Forster 1
- Deformational structures associated with gravitational block gliding: examples from sedimentary olistoliths in the Kalvag Melange, western Norway
Øyvind Steen and Arild Andresen 56
- Humans as geological agents and the question of scale
Jonathan D. Phillips 98
