

American Journal of Science

APRIL/MAY 2001

CONTENTS

Contents	vii
Preface	ix
Fluvial landscape response time: how plausible is steady-state denudation? <i>Kelin X. Whipple</i>	313
Slow rates of rock surface erosion and sediment production across the Namib Desert and escarpment, southern Africa <i>Paul R. Bierman and Marc Caffee</i>	326
Emplacement and denudation history of the Lewis-Eldorado-Hoadley thrust slab in the northern Montana Cordillera, USA: implications for steady-state orogenic processes <i>James W. Sears</i>	359
The approach to steady-state thermochronological distribution following orogenic development in the Southern Alps of New Zealand <i>Geoffrey E. Batt</i>	374
A fluvial record of long-term steady-state uplift and erosion across the Cascadia forearc high, western Washington State <i>Frank J. Pazzaglia and Mark T. Brandon</i>	385
Slope distributions, threshold hillslopes, and steady-state topography <i>David R. Montgomery</i>	432
Uplift, shortening, and steady-state topography in active mountain belts <i>Sean D. Willett, Rudy Slingerland, and Niels Hovius</i>	455
A channelization model of landscape evolution <i>Colin P. Stark and Gavin J. Stark</i>	486
