

American Journal of Science

OCTOBER/NOVEMBER 2004

CONTENTS

Contents		vii
Preface		ix
An equation of state for silicate melts. I. Formulation of a general model		
	<i>Mark S. Ghiorso</i>	637
An equation of state for silicate melts. II. Calibration of volumetric properties at 10^5 Pa		
	<i>Mark S. Ghiorso and Victor C. Kress</i>	679
An equation of state for silicate melts. III. Analysis of stoichiometric liquids at elevated pressure: shock compression data, molecular dynamics simulations and mineral fusion curves		
	<i>Mark S. Ghiorso</i>	752
An equation of state for silicate melts. IV. Calibration of a multicomponent mixing model to 40 GPa		
	<i>Mark S. Ghiorso</i>	811
