

American Journal of Science

FEBRUARY 2010

CONTENTS

- Effect of diagenesis on the Sr, O, and C isotope composition of late Cretaceous mollusks from the Western Interior Seaway of North America 69
J. Kirk Cochran, Kristal Kallenberg, Neil H. Landman, Peter J. Harries, David Weinreb, Karl K. Turekian, Aaron J. Beck, and William A. Cobban 89
- Forward potential-field modeling of the Appalachian orogen in the Gaspé Peninsula (Québec, Canada): Implications for the extent of rift magmatism and the geometry of the taconian orogenic wedge
Nicolas Pinet, Pierre Keating, Denis Lavoie, and Pierre Brouillette
- Is chemical index of alteration (CIA) a reliable proxy for chemical weathering in global drainage basins?
Chao Li and Shouye Yang 111
- Book Review
Geological Fluid Dynamics—Sub-surface Flow and Reactions; by Owen W. Phillips
S. E. Ingebritsen 128
