

American Journal of Science

APRIL 2015

CONTENTS

- A statistical analysis of the carbon isotope record from the Archean to Phanerozoic and implications for the rise of oxygen
Joshua Krissansen-Totton, Roger Buick, and David C. Catling 275
- Rapid change in high-elevation precipitation patterns of western North America during the Middle Eocene Climatic Optimum (MECO)
Andreas Mulch, C. P. Chamberlain, Michael A. Cosca, Christian Teysier, Katharina Methner, Michael T. Hren, and Stephan A. Graham 317
- Positive feedback drives carbon release from soils to atmosphere during Paleocene/Eocene warming
Jennifer M. Cotton, Nathan D. Sheldon, Michael T. Hren, and Timothy M. Gallagher 337
