

American Journal of Science

NOVEMBER 2015

CONTENTS

- Quantifying closed-basin lake temperature and hydrology by inversion of oxygen isotope and trace element paleoclimate records
Daniel E. Ibarra and C. Page Chamberlain 781
- Geochemistry and origin of metamorphosed mafic rocks from the Lower Paleozoic Moretown and Cram Hill Formations of North-Central Vermont: Delamination magmatism in the western New England appalachians
Raymond Coish, Jonathan Kim, Evan Twelker, Scott Zolkos, and Gregory Walsh 809
- High-pressure pelitic granulites from the Helanshan Complex in the Khondalite Belt, North China Craton: Metamorphic P-t path and tectonic implications
Changqing Yin, Guochun Zhao, and Min Sun 846
