CONTENTS

- Interlayer growth kinetics of a binary solid-solution based on the thermodynamic extremal principle: Application to the formation of spinel at periclase-corundum contacts
Rainer Abart, Jiri Svoboda, Petr Jeřábek, Erwin Povoden-Karadeniz, and Gerlinde Habler 309
- Intraplate orogenesis in response to Gondwana assembly: Kwangsian Orogeny, South China
Ya-Jun Xu, Peter A. Cawood, and Yuan-Sheng Du 329
- Dynamics of abundance of the mid- to late Pridoli conodonts from the eastern part of the Silurian Baltic basin: Multifractals, state shifts, and oscillations
Andrej Spiridonov, Antanas Brazauskas, and Sigita Radzevičius 363
