

American Journal of Science

OCTOBER 2018

CONTENTS

- Does large igneous province volcanism always perturb the mercury cycle?
 Comparing the records of Oceanic Anoxic Event 2 and the end-Cretaceous
 to other Mesozoic events
*Lawrence M.E. Percival, Hugh C. Jenkyns, Tamsin A. Mather, Alexander J. Dickson,
 Sietske J. Batenburg, Micha Ruhl, Stephen P. Hesselbo, Richard Barclay, Ian Jarvis,
 Stuart A. Robinson, and Lineke Woelders* 799
- On the geological and scientific legacy of petrogenic organic carbon
Thomas M. Blattmann, Dominik Letsch, and Timothy I. Eglinton 861
- Comment on the “Self-accelerating dolomite-for-calcite replacement model:
 Self-organized dynamics of burial dolomitization and associated mineraliza-
 tion”, v. 311, n. 7, p. 573–607, by Enrique Merino and Àngels Canals
 Mechanisms for hydrothermal dolomite emplacement
David W. Morrow 882
- Reply: Reply to the comment by David W. Morrow on “Self-accelerating dolomite-
 for-calcite replacement: Self-organized dynamics of burial dolomitization
 and associated mineralization”, v. 311, n. 7, p. 573–607.
Enrique Merino and Àngels Canals 887
