CONTENTS

Preface	iii
Atomistic to meso-scale modeling of mineral dissolution: Methods, challenges and prospects <i>Inna Kurganskaya and Ricarda D. Rohlfs</i>	1
Crystal surface reactivity analysis using a combined approach of X-ray micro-computed tomography and vertical scanning interferometry <i>Wolf-Achim Kahl, Tao Yuan, Till Bollermann, Wolfgang Bach, and Cornelius Fischer</i>	27
Temporal evolution of dissolution kinetics of polycrystalline calcite <i>Till Bollermann and Cornelius Fischer</i>	53
Organomineralization of proto-dolomite by a phototrophic microbial mat extracellular polymeric substances: Control of crystal size and its implication for carbonate depositional systems <i>Carlos Paulo, Judith A. Mckenzie, Basirath Raoof, Jörg Bollmann, Roberta Fulthorpe, Christian J. Strohmenger, and Maria Dittrich</i>	72
