

American Journal of Science

MARCH 2020

CONTENTS

- Thermodynamic constraints on the geochemistry of low-temperature, continental, serpentinization-generated fluids
James Andrew M. Leong and Everett L. Shock 185
- Genesis and geodynamic evolution of serpentinitized ultramafics and associated magnesite deposits in the Al-Wask ophiolite, Arabian Shield, Saudi Arabia
Hisham A. Gahlan, Mokhles K. Azer, Paul D. Asimow, and Khaled M. Al-Kahtany 236
- Palynological dating of low-grade metamorphosed rocks: Applications to Early Paleozoic rocks of the Central Maine/Aroostook-Matapedia Basin and Fredericton Trough (Northern Appalachians) in eastern and east-central Maine, U.S.A.
Allan Ludman, Gil Machado, and Paulo Fernandes 280
