

American Journal of Science

OCTOBER 2020

CONTENTS

- Miocene to Pleistocene glacial history of West Antarctica inferred from Nunatak geomorphology and cosmogenic-nuclide measurements on bedrock surfaces
Perry Spector, John Stone, Greg Balco, Trevor Hillebrand, Mika Thompson, and Taryn Black 637
- Zircon U-Pb geochronology and Nd-Pb isotope geochemistry of Blue Ridge basement in the eastern Great Smoky Mountains, U.S.A.: Implications for the Proterozoic tectonic evolution of the southeastern Laurentian margin
D.P. Moecher, F.C. Harris, E.A. Larkin, R.J. Quinn, K.B. Walsh, D.F. Loughry, Jr., E.D. Anderson, S.D. Samson, A.M. Satkoski, and E. Tohver 677
- Redox constraints on a Cenozoic imbalance in the organic carbon cycle
Matthieu E. Galvez 730
