

CONTENTS OF VOLUME XXXV.

NUMBER CIII.

	Page.
ART. I. Mémoires et Souvenirs de AUGUSTIN-PYRAMUS DE CANDOLLE, Ecrits par Lui-même et Publiés par Son Fils,	1
II. Description of a method of Reducing Observations of Temperature; by Prof. J. D. EVERETT, - - - - -	17
III. Remarks upon the Article of J. D. EVERETT; by Prof. E. LOOMIS, - - - - -	31
IV. Upon Natural and Artificial Section in some Chætopod Annelids; by W. C. MINOR, - - - - -	35
V. Remarks on the Temperature of the two extreme Seasons in the Temperate Zones as affected by the Variations in the Sun's Distance and in its Angular Velocity in the Ecliptic; by WILLIAM DENNIS, - - - - -	44
VI. On the Solution of Ice on Inland Waters; by B. F. HARRISON, M.D., U.S.A., - - - - -	49
VII. Caricography; by C. DEWEY, - - - - -	57
VIII. On the identification of the Catskill Red Sandstone Group, with the Chemung; by Prof. A. WINCHELL, - - - - -	61
IX. On the Cause of the Annual Inundation of the Nile; by WILLIAM FERREL, - - - - -	62
X. On the higher subdivisions in the Classification of Mammals; by JAMES D. DANA, - - - - -	65
XI. Astronomical Observations with the Spectroscope; by LEWIS M. RUTHERFURD, - - - - -	71
XII. The Chemical Theory of Interpenetration; by CHARLES S. PEIRCE, A.M., - - - - -	78
XIII. Exposition of the true nature of Pleurodyctium problematicum; by CARL ROMINGER, M.D., - - - - -	82
XIV. Remarks on the family Actæonidæ, with descriptions of some new genera and sub-genera; by F. B. MEEK, - - - - -	84
XV. Contributions from the Sheffield Laboratory of Yale College.—V. On the Equivalent and Spectrum of Cæsium; by S. W. JOHNSON and O. D. ALLEN, - - - - -	94
XVI. On Tellurbismuth from Dahlonga, Georgia; by DAVID M. BALCH.—Communicated by Dr. C. T. JACKSON, - - - - -	99
XVII. Recent Researches relating to Nebulæ; by Professor A. GAUTIER, - - - - -	101

SCIENTIFIC INTELLIGENCE.

- Physics*.—On a new form of Spectroscope; by Dr. WOLCOTT GIBBS, 110.
- General Chemistry*.—On the preparation of Ozone, SCHÖNBEIN: On the allotropic form of Oxygen, SCHÖNBEIN, 111.—The fundamental properties of Oxygen and Hydrogen, HELDT, 112.—On the formation of nitrite of ammonium from water and atmospheric air under the influence of heat, 113.—On a new mode of detecting the presence of small quantities of peroxyd of hydrogen: On the oxythylene bases, WURTZ, 114.—On Acetylene, BERTHELOT: On a new series of compounds containing Boron, FRANKLAND, 115.
- Analytical Chemistry*.—Behavior of Magnesia Salts towards Carbonate of Ammonia, DIVERS, 115.—On Arsenic in Sulphuric Acid, BLOXAM: Estimation of Lime, WICKE: Quantitative determination of Starch, 116.
- Metallurgy*.—Metallurgy. The art of extracting metals from their ores, and adapting them to various purposes of manufacture; by JOHN PERCY: Occurrence of crystallized Siliceon in Pig-Iron, by Prof. ROBERT RICHTER, 118.—Concentration of silver in lead by Pattinson's process: On the desulphuration of iron in puddling, 119.—On the amount of manganese in some varieties of iron, 120.
- Agricultural Chemistry and Vegetable Physiology*.—On the Nature of the Gas produced from the Decomposition of Carbonic Acid by Leaves exposed to the Light; by M. BOUSSINGAULT, 121.—Content of Starch in various Seeds, DRAGENDORFF: Peat-sandstone, Dr. MEYN, 123.—On the occurrence of Silica in the higher Plants, 124.
- Mineralogy and Geology*.—On a variety of Galena from Lebanon county, Pennsylvania; Dr. TORREY, with remarks by Prof. BRUSH, 126.—Discovery of Remains of vertebrated animals provided with feathers, in a deposit of Jurassic age; by A. WAGNER and H. VON MEYER, 129.—Note by JAMES D. DANA, 130.—Additional remarks on the same by Mr. WOODWARD, 132.—On some additional species that are common to Carboniferous and Permian strata, with remarks on the recurrency of Carboniferous species; by JAMES W. KIRKBY, 133.—Geological Survey of Canada.—Report on the Geology of Canada: Descriptive Catalogue of a collection of Economic Minerals of Canada, and of its Crystalline Rocks, 134.
- Botany and Zoology*.—Genera Plantarum ad Exemplarum imprimis in Herbariis Kewensibus servata definita; auctoribus G. BENTHAM et J. D. HOOKER, 134.—Darlingtonia Californica, Torr., 136.—Botanical Collections in the Rocky Mountains, 137.—Species Filicum; by Sir W. J. HOOKER, 138.
- Zoology*.—On the classification of the Brachyura, and on the homologies of the antennary joints in Decapod Crustacea; by WM. STIMPSON, M.D., 139.—Observations on the genus Unio, etc.; by ISAAC LEA, LL.D., 143.
- Astronomy and Meteorology*.—Re-discovery of Daphne, Asteroid (41), 144.—Discovery of a new Asteroid (Galatea) by M. Tempel: Discovery of Asteroid (75), 145.—Astronomical and Meteorological Observations made at the United States Naval Observatory during the year 1861; Commander J. M. GILLISS, U.S.N., Superintendent: Discovery of Asteroid (76), 146.
- Meteorology*.—Shooting Stars of November, 1862, 146.—Observations at Germantown, Pa., by BENJ. V. MARSH: Observations at Haverford College, by Prof. S. J. GUMMERE and Jos. G. PINKHAM: Observations at Weld, Me., by STILLMAN MASTERMAN: Observations at New Haven, by Prof. A. C. TWINING, 147.—Remarks upon Periodic Meteors: Shooting Stars of January 1st-3d; by STILLMAN MASTERMAN, 149.—On the brilliancy of the variable Star, Mira Ceti; by STILLMAN MASTERMAN, 150.
- Miscellaneous Scientific Intelligence*.—Discovery of Antimony in New Brunswick, 150.—Prof. H. A. Ward's Geological Museum, 152.
- Book Notices*.—Sur la Physique du Globe, par A. QUETELET, 152.—Report of a Geological Reconnoissance of Indiana made during the years 1859-60, under direction of the late David Dale Owen, M.D., State Geologist; by RICHARD OWEN, M.D., 154.
- Obituary*.—James Alfred Pearce: Theodore Parkman, 155.
- Proceedings of Societies*.—Bost. Soc. Nat. Hist.: Acad. Nat. Sci. Phil., 156.
