

NUMBER CXIII.

	Page.
ART. XII.—Barometric Indications of a Resisting Aether; by PLINY EARLE CHASE, M.A., S.P.A.S., - - - -	153
XIII. On the Action of Oil-Wells; by Prof. E. W. EVANS, -	159
XIV. Description of a new Machine for Cataloguing and Chart- ing Stars; by G. W. HOUGH, A.M., - - - -	166
XV. Contributions to Lithology; by T. STERRY HUNT, M.A., F.R.S.,	174
XVI. Description of a new species of Chiton; by WILLIAM PRESCOTT, M.D., - - - -	185
XVII. On the rising of Springs and Streams in California, be- fore the winter rains; by H. GIBBONS, M.D., - - -	187
XVIII. Notes on the New Almaden Quicksilver Mines; by B. SILLIMAN, Jr., - - - -	190
XIX. Observations on a Seam of Coal; by Prof. E. B. ANDREWS,	194
XX. On the Chimenti Pictures; by Prof. CHARLES A. JOY, -	199
XXI. Results of some recent Observations on the Solar Surface, with Remarks; by the Rev. W. R. DAWES, - - -	203
XXII. On Molecular Physics; by Prof. W. A. NORTON, - -	207
XXIII. Notice of the Remains of a Mastodon recently discovered in Michigan; by Prof. ALEXANDER WINCHELL, - -	223
XXIV. Chladnite of the Bishopville Meteoric Stone proved to be a Magnesian Pyroxene; by Prof. J. LAWRENCE SMITH, -	225
XXV. Aerial Tides; by PLINY EARLE CHASE, M.A., etc., -	226
XXVI. Extracts from the Address of Dr. J. W. DAWSON, Presi- dent of the Natural History Society of Montreal, - -	231
XXVII. On Celestial Dynamics; by J. R. MAYER, - - -	239
XXVIII. On a supposed change of level in a part of the Green Mountains; by W. K. SCOTT, M.D. From a letter to Prof. O. P. HUBBARD, - - - -	243
XXIX. Notes on the Platinum Metals; by M. CAREY LEA. Part II. On Reactions of the Platinum Metals, - - -	248
XXX. Progress of the Geological Survey of California, - -	256

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a new class of Sulphur compounds, VON OEFELE: On a very sensitive reaction for Iron, NATANSON: On the conversion of mono-carbon acids into the corresponding more highly carbonated di-carbon acids, KOLBE and MÜLLER, 265.—On Thallium, CROOKES: On Cobaltic acid, WINKLER, 266.—New method of

reduction especially applicable to a large number of metals: Bromid of potassium, a powerful narcotic: Elements of Chemistry, Theoretical and Practical, by WILLIAM ALLEN MILLER, M.D., LL.D., &c.: Manual of Qualitative Chemical Analysis, by Dr. C. R. FRESSENIUS—American edition, edited by Prof. SAMUEL W. JOHNSON: On the nature of Heat-vibrations, by Mr. JAMES CROLL, 267.—On Periodic Changes in the Magnetic condition of the Earth, and in the Distribution of Temperature on its Surface, by Mr. BAXENDELL, F.R.A.S., 269.

Mineralogy and Geology.—Analysis of Swedish and Norwegian Minerals, by J. A. MICHAELSON, 274.—Kokscharovite, HERMANN, 275.—Samaraskite, FINKENER: Kupfferite: Planerite, a new mineral, HERMANN, 276.—Forcherite, AUHORN: Garnet, PISANI: Native zinc, PHIPSON: Esmarkite, PISANI: Infusorial earth from Bohemia: R. HOFFMANN: On a cavern with human remains in the Pyrenees, by Messrs. F. GARRIGOU and L. MARTIN, 277.—On further discoveries of Flint Implements and Fossil Mammalia, by J. WYATT, Esq., F.G.S.: On some recent discoveries of Flint Implements in Drift Deposits in Hants and Wilts, by JOHN EVANS, Esq., F.G.S., 280.—Lake-dwellings or Pfahlbauten in Bavaria: On some Bone- and Cave-deposits of the Reindeer period in the south of France, by Mr. JOHN EVANS, F.R.S.: On the Cavern of Bruniquel and the Human Remains found therein; by Prof. OWEN, 281.—On Human Remains in Caves at Gibraltar, by GEO. BUSK, 282.—On the Rhætic Beds and White Lias of Western and Central Somerset, and the Discovery of a new Fossil Mammal, by Mr. W. BOYD DAWKINS, 284.—Mesozoic Mammals: On the transitions between the subdivisions of the Lias and Oolite in England, by Prof. A. C. RAMSAY, F.R.S., 285.—On the Permian Rocks of the Northwest of England, and their extension into Scotland, by Sir R. I. MURCHISON, K.C.B., etc., and Prof. R. HARKNESS, F.R.S., etc., 287.—On the Reptiliferous Rocks and Footprint Strata of the Northeast of Scotland, by Prof. HARKNESS, F.R.S.S., L. & E.: Coal in Venezuela, 288.—On the Geology of Arisaig, Nova Scotia, by Rev. D. HONEYMAN, F.G.S., 289.

Botany and Zoology.—New Scirpi of the Northern United States, 289.—De Candolle, Prodomus Systematis Naturalis Regni Vegetabilis, etc., 290.—Bryology of British N. W. America; Icones Muscorum, by W. S. SULLIVANT: On the Currant Worm of Ann Arbor, Michigan; by Prof. A. WINCHELL, 291.—Casts of various parts of the structure of the Gorilla, 292.—Animalcules in the blood: Cephalic vertebræ: Marine Crustaceans in freshwater lakes of Norway, 293.—Hymenoptera: Didunculus: Note on the Muscovy Duck, by Mr. HILL: The Elements of Comparative Anatomy, by Prof. THOMAS HENRY HUXLEY, F.R.S., 294.—Cast of the Megatherium Cuvieri, in the Museum of the Rochester University: Recherches sur la Faune Littorale de Belgique, par Prof. P.-J. VAN BENEDEEN, 295.

Astronomy.—Note on a Meteor, by JOHN GARDNER, 295.—List of Radiant Points in Shooting Stars, by Prof. HEIS: New Comet, 296.

Miscellaneous Scientific Intelligence.—Further Human remains from the Quarry of Moulins-Quignon: Interoceanic canal across the Isthmus between the two Americas, 297.—Note supplementary to the article on the Progress of the Geological Survey of California, 298.—A New Silkworm: A new style of barometer—effect of atmospheric pressure on Gunner: Paper from Maize: Preservation of wood: Morid's process for recovering writing nearly effaced: The ravages of Insects a cause of their destruction, 299.—Means of hardening fragile or friable specimens: Elevation of Lake Geneva above the sea: Investigations in Egypt: Isthmus of Suez: Making of Oases: Acclimation of English Birds in Australia: Dedication of the Museum of the Bost. Soc. of Nat. History: Universal Exhibition at New Zealand, 300: British Association: Sir Charles Lyell: Prize to Mr. Ruhmkorff: Prize to Mr. Sorel: Alger's Cabinet of Minerals for sale, 301.

Obituary.—Evan Pugh, Ph.D., F.C.S., 301.—Francis Alger, 302.

Miscellaneous Bibliography.—Review of American Birds in the Museum of the Smithsonian Institution, by S. F. BAIRD: Observations on the Terrestrial Pulmonifera of Maine, etc., by EDWARD S. MORSE: The American Annual Encyclopedia and Register of Important Events of the year 1863: Passages from the Life of a Philosopher, by CHARLES BABBAGE, 303.—Notices of New Works, 304.

NUMBER CXIV.

	Page.
Art. XXXI. Heinrich Rose,	305
XXXII. On the cellular structure of <i>Actinophrys Eichornii</i> ; by Prof. H. JAMES CLARK,	331
XXXIII. On the origin of the Prairies of the Valley of the Mississippi; by Prof. ALEXANDER WINCHELL,	332
XXXIV. On the Nebular Hypothesis; by DAVID TROWBRIDGE, A.M.,	344
XXXV. Note on a Colored derivative of Naphthaline; by M. CAREY LEA,	360
XXXVI. On the study of the Electric Spark by the aid of Photography; by Prof. OGDEN N. ROOD,	361
XXXVII. Dependence of Terrestrial Magnetism on Atmospheric Currents; by PLINY EARLE CHASE, M.A., S.P.A.S.,	373
XXXVIII. On the Principal Causes of Barometric Fluctuations; by PLINY EARLE CHASE, M.A., S.P.A.S.,	380
XXXIX. A new Meteoric Iron from Wayne County, Ohio.—Some remarks on the recently described Meteorite from Atacama, Chili; by Prof. J. LAWRENCE SMITH,	385
XL. On a Process of Organic Elementary Analysis, by Combustion in a Stream of Oxygen Gas; by C. M. WARREN,	387
XLI. On Celestial Dynamics; by J. R. MAYER,	397
XLII. Notice of a new fossil Annelid (<i>Helminthodes antiquus</i>), from the Lithographic Slates of Solenhofen; by O. C. MARSH, F.G.S.,	415

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the wave-lengths of the luminous and ultra-violet rays, MASCART, 415.—On the determination of wave-lengths by means of interference bands, BERNARD, 416.—On the atomic weight of Thorium and the formula of Thoria, DELAFONTAINE, 417.—On Yttria, POPP, 418.—On the separation of Cerium from Lanthanum and Didymium, POPP: On Wasium, POPP and DELAFONTAINE: Preliminary notice of a new earth, BISCHOF, 419.—Thallium: Refractory character of alumina and silica, C.
