

CONTENTS OF VOLUME XXXIX.

NUMBER CXV.

	Page.
BENJAMIN SILLIMAN,	1
ART. II. Notice of the Explorations of the Geological Survey of California, in the Sierra Nevada, during the summer of 1864,	10
III. On the Mineral Waters of Bath and other hot springs, and their Geological effects; by Sir CHARLES LYELL,	13
IV. On the Nebular Hypothesis; by DAVID TROWBRIDGE, A.M.,	25
V. On Brushite, a new mineral occurring in Phosphatic Guano; by GIDEON E. MOORE, Ph.B.,	43
VI. On the Crystallization of Brushite; by JAMES D. DANA,	45
VII. Introduction to the Mathematical Principles of the Nebular Theory, or Planetology; by Prof. GUSTAVUS HINRICHS,	46
VIII. Contributions to Chemistry from the Laboratory of the Lawrence Scientific School; by Prof. WOLCOTT GIBBS, M.D. —No. 2,	58
IX. Note on the Planetary Distances; by Prof. DANIEL KIRKWOOD,	66
X. Caricography; by Prof. C. DEWEY,	69
XI. On the Action of Ozone upon insensitive Iodid and Bromid of Silver; by M. CAREY LEA,	74
XII. Prize for applications of the Electric Pile.—Heterogeny.—Influence of Light on Proto-organisms.—Association for the Advancement of Meteorology.—On the intensity of action of the Solar disk.—Acclimation of Salmon in Australia.—Production of the Sexes.—Cutting of the Isthmus of Suez.—First idea of Electric Telegraphy. Correspondence of Prof. J. NICKLÈS,	79
XIII. Discovery of Emery in Chester, Mass.; by CHARLES T. JACKSON, M.D.,	87
XIV. On the Solubility of the Sulphate of Baryta in Sulphuric Acid; by Prof. J. NICKLÈS,	90

SCIENTIFIC INTELLIGENCE.

- Physics and Chemistry.*—On a new saccharimeter, WILD, 91.—On the mechanical energy of chemical action, 92.—On the replacement of hydrogen in ether by chlorine, ethyl, and oxethyl, LIEBEN and BAUER: On a new mode of preparing oxygen, RUBINS, 95.
- Geology.*—On buried stems and branches in Illinois; by J. S. BLISS, 95.—On the Geology of Eastern New York; by Prof. JAMES HALL and Sir WILLIAM E. LOGAN, 96.—Action of Glaciers; by J. RUSKIN, 98.—Geological Survey of California; J. D. WHITNEY, 99.—Oil region of Pennsylvania; by IRA SAYLES, 100.—Petroleum in California, 101.
- Botany and Zoology.*—Dioico-dimorphism in the Primrose Family, 101.—Observations upon Dimorphous Flowers; by H. VON MOHL, 104.—*Najas major*, *Ruppia maritima*, etc., discovered at Salina, N. Y., 106.—Spontaneous return of hybrid plants to their parental forms, 107.—Flora of the British West Indian Islands; by Prof. A. H. R. GRIEBACH, M.D., 108.—*Florula Australiensis*: a Description of the Plants of the Australian Territory; by GEORGE BENTHAM, F.R.S., etc., and FERDINAND MULLER, M.D., etc.: Upon a form of budding in some Insect Larves, 110.
- Astronomy.*—Discovery of a new Planet, Terpsichore, (♁): New Comet, 111.—Numbers of stars in the northern hemisphere: On the age of the moon's surface; by J. NASMYTH: On the probable error of a Meridional Transit-observation, by the eye-and-ear, and Chronographic method; by EDWIN DUNKIN, Esq., 112.—Shooting stars in November, 1864: Supplementary note to the article on the Nebular Hypothesis, 113.
- Miscellaneous Intelligence and Bibliography.*—National Academy of Sciences: American Philosophical Society: Medals of the Royal Society: H. R. Schoolcraft: F. W. Struve: Thoughts on the Influence of Ether in the Solar System, etc., by ALEXANDER WILCOCKS, M.D., 114.—Report of the Superintendent of the Coast Survey during the year 1862: Eulogy on Joseph S. Hubbard, by B. A. GOULD: Chambers's Encyclopedia: Meteorological Observations at the Magnetical Observatory, Toronto: Review of American Birds, by S. F. BAIRD, 115.—Monograph of the Bats of North America, by H. ALLEN, M.D.: American Journal of Conchology: Notices of New Works, 416.

NUMBER CXVI.

	Page.
ART. XVI. On Terrestrial Magnetism, as a mode of Motion; by PLINY EARLE CHASE, - - - - -	117
XVI bis. On the construction of the Spectroscope; by LEWIS M. RUTHERFURD, - - - - -	129
XVII. Contributions from the Sheffield Laboratory of Yale Col- lege. No. VIII.—On crystallized Diopside as a furnace product; by GEORGE J. BRUSH, - - - - -	132
