

NUMBER CXXIII.

	Page.
ART. XXXVI. On some of the Mining Districts of Arizona near the Rio Colorado, with remarks on the Climate, &c.; by B. SILLIMAN,	289
XXXVII. A method of Giving and of Measuring the angles of Crystals, for the determination of species, by the use of the Reflecting Goniometer; by JOHN M. BLAKE,	308
XXXVIII. On the Quaternary Formations of the State of Mississippi; by EUG. W. HILGARD, Ph.D.,	311
XXXIX. Caricography; by Prof. C. DEWEY,	326
XL. On a Mechanical Finger for use with the Microscope; by H. L. SMITH,	331
XLI. The Distribution and Migrations of North American Birds; by SPENCER F. BAIRD,	337
XLII. On the Meteoric Fireball of July 13th, 1846; by Prof. DANIEL KIRKWOOD,	347
XLIII. Whitney's Geology of California,	351
XLIV. On the Green tint produced by mixing blue and yellow powders; by Prof. O. N. ROOD,	369
XLV. A method of estimating and Correcting the Error caused by the unequal length of the Calendar Months, in reducing Observations of Temperature; by E. L. DEFOREST,	371
XLVI. On the comparative composition of some Recent Shells, a Silurian Fossil Shell, and a Carboniferous Shell Limestone; by Prof. How,	379
XLVII. Experiments on the Production of Organisms in Closed Vessels; by GEORGE CHILD, M.D.,	381
XLVIII. A word on the Origin of Life; by JAMES D. DANA, Observations by Prof. W. H. BREWER on the presence of living species in hot and saline waters in California, and on the tenacity of life of the seeds and spores of some plants,	389 391
XLIX. On the Corundophilite of Shepard; by F. PISANI,	394

SCIENTIFIC INTELLIGENCE.

- Chemistry and Physics.*—On the wave-lengths of Fraunhofer's lines, DITSCHNER, 395.
—On the mechanical equivalent of light, THOMSEN, 396.—Niobium and Tantalum, MARIIGNAC, 397.—On Yttria and Erbica, BAHR and BUNSEN, 399.
- Mineralogy and Geology.*—Notes on Chalk and Cretaceous Deposits in Eastern Colorado, by D. C. COLLIER, 401.—Volcanic eruption at Santorin, Grecian Archipelago, and the formation of a new island in the Bay, J. DECIGALA, 403.—Notes on some points in the geology of Kansas, by Prof. G. C. SWALLOW, 405.—Evidence of a probable mod-

ern change of level on the coast of Florida, by E. LEWIS, Jr.: Supplemental Notes on the Structure and Affinities of *Eozoön Canadense*, by W. B. CARPENTER, M.D., F.R.S.: Fossils of the Sierra Nevada, 406.—Geological Sketches, by L. AGASSIZ, 407.—Geological Map of Canada, etc., 403.—Contributions to the Paleontology of Illinois and other Western States, by F. B. MEEK and A. H. WORTHEN: Observations on the Microscopic Shell-structure of *Spirifer cuspidatus*, Sowerby, and some similar forms, by F. B. MEEK: Enumeration of Fossils collected in the Niagara Limestone at Chicago, Illinois, with descriptions of several new species, by Prof. A. WINCHELL and O. MARCOV: Mineralogische Notizen, by F. HESSENBERG: The Geology of Tennessee, by J. M. SAFFORD, A.M., 409.—A Catalogue of the Palaeozoic Fossils of North America, by B. F. STUMARD, M.D.: Professor Oppel's collection of Jurassic Fossils of Europe and Great Britain, 410.

Botany and Zoology.—Natural History Transactions and Journals, 410.—Flora Brasiliensis: Morphology of the Androecium in Fumariaceæ, 412.—Flora Vitiensis; a Description of the plants of the Viti or Fiji Islands, etc., by BERTHOLD SEEMANN, Ph.D., etc., 414.—Botany of Australia: Analytical Drawings of Australian Mosses, edited by FERN. MÜLLER, 415.—The Vegetation of the Chatham Islands, sketched by Ferdinand Müller: Revision of the genus *Cousinia*, von Dr. AL. BUNGE: KNOX, Monograph of Valerianææ, 416.—*Scolopendrium officinarum*: Musci Boreali-Americani, sive Specimina Exsiccata Muscorum in America Republicis Fœderatis detectorum; conjunctis studiis W. S. SULLIVANT et L. LESQUERREUX, 417.—Mind in Nature or the Origin of Life and the Mode of Development of Animals; by Prof. H. J. CLARK, 418.—The Urine in Health and Disease, 422.

Miscellaneous Scientific Intelligence.—National Academy of Sciences, 423.—Note on Illumination of opaque objects under the Microscope, by H. L. SMITH: New Eruption of Mauna Loa, by Rev. TITUS COAN, 424.—American Association for the Advancement of Science: On Magnesia in hydraulic cements, by H. ST. CLAIRE DEVILLE, 425.—Meteorites of Annale, Algeria: Large mass of meteoric iron, 426.—Remains of the Post-tertiary Mastodon or Elephant in Montana: Artificial Ivory: Solution of Silk: New artificial light for photography: New test for distinguishing Cane sugar from sugar of Grapes: Petroleum in Archangel: Petroleum of Zante: Discovery of Stone-impliments on the Island of Elba by Mr. Foresi: Polar expedition of Prussia and Austria, 427.—Geological Survey of California: Copley Medal, 428.—*Obituary.*—Dr. Whewell: Mr. William Thomas Brande, 429.—Dr. Wm. M. Uhler, 429.

Miscellaneous Bibliography.—Carte Agronomique des Environs de Paris, etc.: Swedish Geological Survey, 429.—Die Steinkohlen Deutschland's und anderer Länder Europa's; by Dr. H. B. GEINITZ, Dr. H. FLECK and Dr. E. HARTIG: Annual of the National Academy of Sciences for 1865: Report of the Commissioner of Agriculture for the year 1864: Reise der österreichischen Fregatte Novara um die Erde in 1857, 1858, 1859, etc., 430.—Illustrated Catalogue of the Museum of Comparative Zoology at Harvard College; by ALEXANDER AGASSIZ: Notices of New Works and Proceedings of Societies, 431.

Index, 432.

ERRATA.

In part of edition, p. 118, 8 l. from foot, for "46-173," read "461-73." P. 143, 3 l. from foot, for "an," read "an."

Page 220, l. 8 from top, for "rifles," read "rifles."—Same page, l. 17 from bottom, for "rifles," read "rifles."
