

NUMBER XC.

	Page
ART. LX.—Transmission of Sensation and Volition through the Nerves; by M. M. GARVER,	413
LXI.—Upper Devonian Rocks of Southwest Pennsylvania; by J. J. STEVENSON,	423
LXII.—Absolute Unit of Electrical Resistance; by H. A. ROWLAND,	430
LXIII.—Ancient Outlet of Great Salt Lake; by A. C. PEALE,	439
LXIV.—Ferment-theory of Nitrification; by F. H. STORER,	444
LXV.—J. W. Powell's Geographical and Geological Survey of the Rocky Mountain Region,	449
LXVI.—Transit of Mercury; by JOHN RODGERS,	455
LXVII.—Transit of Mercury; by S. P. LANGLEY,	457
LXVIII.—Fossil Mammal from the Jurassic of the Rocky Mountains; by O. C. MARSH,	459
LXIX.—Shale recently discovered below the Devonian Limestones at Independence, Iowa; by S. CALVIN,	460
LXX.—Joseph Henry, LL.D.,	462
LXXI.—Letter from B. A. GOULD, Director of the Cordoba Observatory,	468

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Expansion of the Solid Elements a Function of their Atomic weight, WIEBE, 472.—Gallium, LECOQ DE BOISBAUDRAN, 473.—Dimethylethylene, or normal Butylene, ETARD, 474.—Oil of Tansy and Oil of Valerian, BRUYLANTS, 475.—Xanthin-like bodies from Albuminates in Pancreatic Digestion, SALOMON: Present Condition of Electrical Meteorology, PALMIERI, 476.—Floating Magnets: Note on Floating Magnets, A. M. MAYER, 477.

Geology and Mineralogy.—Supplement to the Second Edition of Acadian Geology, J. W. DAWSON, 478.—Recherches expérimentales sur les cassures qui traversent l'écorce terrestre, M. DAUBRÉE, 450.—New Phosphate from Fairfield County, Connecticut, G. J. BRUSH and E. S. DANA, 481.—Mineralogische Mittheilungen, vom RATH: Das Erdbeben von Herzogenrath am 24 Juni, 1877, Dr. VON LASAULX: Die Mineralogie, VON KOBELL, 482.

Botany and Zoology.—Early Introduction and Spread of the Barberry in Eastern New England, 482.—Ferns of North America, D. C. EATON, 483.—Dictionnaire de Botanique: Vargas considerato como Botanico: Dr. Thomas Thomson, 484.

Astronomy.—Transit of Mercury, 484.

Miscellaneous Scientific Intelligence.—International Geological Congress: National Academy of Sciences, 485.—United States National Museum: Payen's Manual of Industrial Chemistry: Smithsonian Institution: American Association: British Association; Rate of Earthquake Wave Transit, 486.

INDEX, 487.
