

CONTENTS OF VOLUME XXXII.

NUMBER CLXXXVII.

	Page
ART. I.—Memorial of Edward Tuckerman; by ASA GRAY..	1
II.—Notes on American Earthquakes, No. 15; by C. G. ROCKWOOD, JR.	7
III.—Observations on the Tertiary and Grand Gulf of Mississippi; by O. MEYER	20
IV.—Notes on the Volcanic Rocks of the Republic of Salvador, Central America; by A. HAGUE and J. P. IDDINGS..	26
V.—The Genus <i>Strephochetus</i> : Distribution and Species; by H. M. SEELY	31
VI.—Preliminary Report on the Geology of the Cobscok Bay District, Maine; by N. S. SHALER	35
VII.—On the Well-Spherometer; an instrument that measures the radius of curvature of a lens of any linear aperture; by A. M. MAYER	61
VIII.—On some general terms applied to Metamorphism, and to the Porphyritic Structure of Rocks; by J. D. DANA..	69

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On a new Absolute Electrometer, BICHAT and BLONDLOT, 72.—On the Influence of Temperature on the Heat of Chemical Combination, PICKERING, 73.—On the Hypochlorites of Ethyl and Methyl, SANDMEYER, 74.—On the Existence and Formation of Nitrates in Plants, BERTHELOT and ANDRÉ, 75.—On the earth Ya and Mosandria, CROOKES: On the Spontaneous Polymerization of volatile Hydrocarbons at ordinary temperatures, H. E. ROSCOE, 76.

Geology and Natural History.—The Cretaceous Flora of North America, NEWBERRY: Periods of enlargement and diminution in the Glaciers of the Alps, FOREL: Maps published by the U. S. Geological Survey, 77.—Stromatopora, C. ROMINGER: Palæontologica Indica: Microscopic characters of some specimens of devitrified glass, D. HERMAN and F. RUTLEY, 78.—E. O. Ulrich's Contributions to American Palæontology: Class-book of Geology, A. GEIKIE, 79.—Ancient Herbaria, SAINT-LAGER: The Journal of the Linnæan Society, 80.—Heterogeneous Grafting: Contagious diseases of Insects, 81.—Proceedings of the Davenport Academy of Natural Sciences: Annalen der k. k. Naturhistorischen Hofmuseums redigirt von Dr. Franz Ritter von Hauer, 82.

Miscellaneous Scientific Intelligence.—American Association for the Advancement of Science, 82.
