

Number 135.

	Page
ART. XV.—Evolution of the Horse Family, as illustrated in the Yale Collections; by R. S. LULL.....	161
XVI.—Clay of Probable Cretaceous Age at Boston, Massachusetts; by F. G. CLAPP.....	183
XVII.—Lower Huronian Ice Age; by A. P. COLEMAN.....	187
XVIII.—New Species of <i>Baptanodon</i> from the Jurassic of Wyoming; by C. W. GILMORE.....	193
XIX.—Almost Complete Specimen of <i>Strenuella strenua</i> (Billings); by H. W. SHIMER.....	199
XX.—Changes of the Colloidal Nucleation of Dust-free Wet Air in the Lapse of Time; by C. BARUS.....	202
XXI.—Use of Succinic Acid as a Standard in Alkalimetry and Acidimetry; by I. K. PHELPS and J. L. HUBBARD.....	211
XXII.—Divergence and Curl; by E. B. WILSON.....	214

SCIENTIFIC INTELLIGENCE.

- Chemistry and Physics*—Misconception of Critical Temperature, J. W. GREGORY: New Determination of Free Sulphur, E. BERGER, 221.—Detection of Traces of Zinc, BERTRAND and JAVILLIER: Compounds of Ferrous Salts with Nitric Oxide, MANCHOT and ZECHENTMEYER, 222.—Chemical Abstracts of the American Chemical Society: Perception of Sound Direction, RAYLEIGH, 224.—Ionization of the Atmosphere over the Ocean, A. S. EVE: Diurnal Periodicity of the Ionization of Air, WOOD and CAMPBELL, 224.
- Geology and Mineralogy*—U. S. Geological Survey, 27th Annual Report, C. D. WALCOTT, 225.—Publications of U. S. Geol. Survey: Rate of Recession of Niagara Falls, G. K. GILBERT, 226.—Geol. Report on Bay Co., Mich., W. F. COOPER: Illinois State Geol. Survey, H. F. BAIN, 227.—Postglacial Faults of East. New York, J. B. WOODWORTH: Lunar and Hawaiian Physical Features Compared, W. H. PICKERING, 228.—Origin of Laterites, M. MACLAREN, 229.—Roches alcalines de l'Est-Africain, ARSANDAUX, 230.—Theory of Glacial Motion, O. W. WILLCOX: Decomposition of Feldspars, CUSHMAN and HUBBARD, 231.—Minerals from Lyon Mt., N. Y., H. P. WHITLOCK: Synopsis of Mineral Characters for Laboratory and Field Use, R. W. RICHARDS: Native Copper from Bisbee, 232.
- Paleobotany and Zoology*—Cretaceous Flora of Southern New York and New England, A. HOLLICK, 233.—Life and Work of Bernard Renault, D. H. SCOTT, 234.—Present Position of Palaeozoic Botany, D. H. SCOTT: The Seed, a Chapter in Evolution, F. W. OLIVER, 235.—Aracariæ, SEWARD and FORD: Florule Portlandienne, FLICHE and ZEILLER: Rhætic flora of Persia, ZEILLER: Affinities of certain Cretaceous Plant Remains, A. HOLLICK and E. C. JEFFREY, 236.—Paleobotany of the Cretaceous of Long Island, A. HOLLICK: Tertiary Lignite of Brandon, Vt., G. H. PERKINS: *Suteliffia insignis*, D. H. SCOTT: *Cycadofilices*, D. WHITE: Seeds of *Aneimites*, D. WHITE, 237.—Microsporangia of *Pteridospermeæ*, R. KIDSTON: Flora der unteren Kreide Quedlinburgs, P. B. RICHTER: *Dictyophyllum* und *Camptopris 4 spialalis*, A. G. NATHORST, 238.—*Clathropteris meniscoides*, A. G. NATHORST: Germinating Spores in *Stauropteris oldhymia*, D. H. SCOTT, 239.—*Tubicaulis Suteliffii*, MARIE C. STOPES: Structure of *Sigillaria elegans*, R. KIDSTON: Megaspore of *Lepidostrobus foliaceus*, RINA SCOTT: Algue Oxfordienne, O. LIGNIER: *Brillenkaïmane*, Brazil, F. SIEBENROCK, 240.—Maldive and Laccadive Archipelagoes, 241.
- Miscellaneous Scientific Intelligence*—Annual Reports of the Smithsonian Institution, 242.—U. S. Coast and Geodetic Survey: Carnegie Institution of Washington, 243.—Carnegie Foundation for the Advancement of Teaching; First Annual Report: Meteorite from Selma, Ala., 244.
- Obituary*—Sir MICHAEL FOSTER: Prof. D. I. MENDELÉEUF, 244.
